

Space Shuttle

 **Total time: 10 minutes**

 **Activity difficulty - Easy**

Instructions

It's not a paper plane it's a space shuttle! Kickstart their space adventures with this quick and easy guide. Your budding astronaut has missions to complete.

1. Print PDF on A4 paper.
2. Fold it in half, lengthwise. This means folding the two long sides together.
3. Fold the top corners in to the centre. Make the fold nice and crisp, using a ruler.
4. Fold the angled edge into the centre. Take the new angled sides and fold them both in to meet at the centre fold.
5. Fold the angled edge into the centre. Take the new angled sides and fold them both in to meet at the centre fold again!
6. Fold along the centre line. This fold should hide all of the other folds inside.
7. Fold down the wings. Fold down the two top flaps to make the wings. These folds will also need to be crisp, so use a hard edge to make the fold (like your nail).
8. Time to add some colour. Let your astronaut get creative with their design!
9. Lift Off! Where will their space adventure lead them?

You will need:

- ✓ A4 paper
- ✓ Colouring pens/pencils
